“No project is impossible — as long as I love what I do.”

SUMMARY

Technical Project Manager committed to a long-term career in project management. Currently leading end-to-end project delivery at Transcosmos Indonesia (promoted August 2025), bringing 5+ years of hands-on Front-End Development experience—HTML/CSS/JavaScript, REST APIs, and CMS platforms—into cross-functional team leadership across engineering, QA, creative, and business stakeholders. Continuously deepens project management expertise through ongoing learning and certifications, with a sharp focus on improving team efficiency and streamlining delivery workflows to ship faster without compromising quality.

EXPERIENCE

Transcosmos Indonesia

Jakarta, Indonesia • Dec 2022 – Present

Technical Project Manager ↑ PROMOTED

Aug 2025 – Present • Promoted from Front-End Developer

- Lead cross-functional teams of engineers, QA, creative, business, and client stakeholders to deliver projects on time and within scope.
- Define project scope, schedules, and milestones; produce project plans, requirements documentation, and executive status reports.
- Maintain risk and issue logs, drive mitigation strategies, and escalate blockers in a timely manner to keep delivery on track.
- Standardized team documentation and communication cadences, reducing misalignment and project turnaround time.
- Serve as primary client contact—aligning expectations, clarifying requirements, and providing progress updates.

Front-End Developer

Dec 2022 – Aug 2025

- Built responsive, accessible user interfaces with HTML5, CSS/SCSS, and JavaScript aligned to UX specifications and brand guidelines.
- Translated wireframes into reusable components and templates; ensured cross-browser compatibility and mobile performance.
- Integrated REST APIs with back-end engineers to ensure data integrity and seamless user flows.
- Optimized application performance and bundle size; resolved UI bugs and regressions through systematic QA.

KEY ACHIEVEMENTS

In-House Web Builder Product

Designed and built a proprietary web builder platform adopted as an official company product, accelerating delivery and ensuring consistency across client engagements.

Pre-Sales Collaboration

Partnered with pre-sales teams across multiple opportunities to scope project enhancements and translate client requirements into actionable delivery plans.

Multi-Domain Project Delivery

Successfully led web projects across diverse domains, including corporate profile websites, job portals, and e-commerce platforms.

Risk Management

Team Leadership

Stakeholder Engagement

Agile / SDLC

Documentation & Reporting

Front-End Development

REST API Integration

E-commerce Operations

Problem Solving

TRAINING & COURSES

Google Project Management Certificate

Coursera, 2025

Web Development Intensive

Course-Net, Jakarta, Aug – Sept 2018

Front-End Developer & E-commerce Officer

- Developed and customized Magento front-end themes, layouts, and CMS blocks to support campaigns and seasonal events.
- Managed product catalog operations: uploads, pricing, promotions, vouchers, and content updates for accuracy and consistency.
- Executed on-site merchandising, landing pages, banners, and storefront refreshes; performed QA and UI improvements to enhance usability and conversion.

Onero Solutions

Jakarta, Indonesia • Feb 2019 – Feb 2020

Front-End Developer

- Developed responsive web interfaces using HTML, CSS/SCSS, JavaScript, and jQuery aligned to UI/UX specifications.
- Collaborated with back-end engineers to integrate APIs and ensure data integrity across user-facing flows.
- Optimized performance, cross-browser compatibility, and accessibility; maintained code quality through version control and peer review.

EDUCATION

Bachelor of Information Systems

BINUS University

May 2016 – Sept 2020 • Jakarta, Indonesia

- Major: Information Systems.
- Key coursework: Application Development, SDLC, Startup & Entrepreneurship.
- Activities: BINUS Game Development Club (BGDC); BINUS English Club (BNEC).

PROJECT TYPES DELIVERED

Corporate Profile Websites

Multi-page brand and product sites with CMS-driven content for enterprise clients.

E-commerce Platforms

Magento storefronts with promotions, vouchers, and seasonal campaign rollouts.

Job Portals

Search, listings, application flow, and candidate tracking experiences.

In-House Web Builder

Proprietary platform accelerating client delivery and ensuring brand consistency.

Arif Maulana • Technical Project Manager • Jakarta, Indonesia

TOOLS & TECHNOLOGIES

Project Management: ClickUp

Productivity: Microsoft Excel, PowerPoint, Word

Engineering: Git, GitHub, HTML/CSS/JavaScript, REST APIs

CMS: Adobe Experience Manager (AEM), Magento

WORKING STYLE

Delivery-First

Plans backwards from the delivery date; turns ambiguity into clear milestones and owners.

Builder Mindset

Engineering background makes scoping realistic and conversations with developers efficient.

Documentation as a Tool

Treats clean status reports and risk logs as leverage, not paperwork.

Clear Communication & Brainstorming

Aligns engineering, business, and client through plain language and structured discussion.
